General and complete disarmament: transparency in armaments

United Nations Register of Conventional Arms

Report of the Secretary-General

Summary

The present report is the eleventh consolidated report issued by the Secretary-General since the establishment of the Register.** It contains data and information provided by 115 Governments on imports and exports of conventional arms covered under the Register: battle tanks, armoured combat vehicles, large-calibre artillery systems, attack helicopters, combat aircraft, warships and missiles and missile launchers for the calendar year 2002. The report includes additional information provided by Governments on procurement through national production and military holdings as well as views received from Governments on the continuing operation of the Register and its further development and on transparency measures related to weapons of mass destruction. The replies received are contained in sections II and IV and in the annex to the present document.

Section III of the present report contains an index of the background information submitted by Governments in accordance with paragraphs 10 and 18 of General Assembly resolution 46/36 L of 9 December 1991 and paragraph 5 of resolution 47/52 L of 15 December 1992. The background information is available for consultation at the Department for Disarmament Affairs of the Secretariat.

All relevant information on the United Nations register is available electronically on the Department's United Nations Register web site: http://disarmament.un.org/cab/register.html.

Note: The information provided by Member States has been reproduced as received. The designations employed do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory or area, or of its authorities.

I. Introduction

1. At its fifty-seventh session, the General Assembly, in its resolution 57/75 of 22 November 2002, called upon Member States, with a view to achieving universal participation, to provide the Secretary-General by 31 May annually with the requested data and information for the United Nations Register of Conventional Arms, including "nil" reports if appropriate, on the basis of resolutions 46/36 L and 47/52 L and the recommendations contained in the 1997 and 2000 reports of the Secretary-General on the continuing operation of the Register and its further development (A/52/316, para. 64, and A/55/281, para. 94). In addition, the Assembly invited Member States in a position to do so, pending further development of the Register, to provide additional information on procurement from national production and military holdings, and to make use of the "Remarks" column in the standardized reporting form to provide additional information such as types or models.

2. In the same resolution, the General Assembly reaffirmed its decision, with a view to the further development of the Register, to keep the scope of and participation in the Register under review and, to that end, recalled its request to Member States to provide the Secretary-General with their views on the continuing operation of the Register and its further development and on transparency measures related to weapons of mass destruction. In accordance with that request, the Secretary-General has received views from Cuba. Those views are contained in the annex to the present report.

3. In the same resolution, the General Assembly also requested the Secretary-General, with the assistance of a group of governmental experts to be convened in 2003, on the basis of equitable geographical representation, to prepare a report on the continuing operation of the Register and its further development, taking into account the work of the Conference on Disarmament, the views expressed by Member States and his reports on the continuing operation of the Register and its further development, with a view to taking a decision on the matter at its fifty-eighth session.

4. Furthermore, the General Assembly requested that the Secretary-General implement the recommendations contained in his 2000 report on the continuing operation of the Register and its further development (A/55/281). Pursuant to those recommendations, the Secretariat engaged in a number of activities to enhance familiarity with and encourage greater participation in the Register. The Department for Disarmament Affairs cooperated with the Governments of Canada, Germany, Japan and the Netherlands in the holding of two workshops on transparency in armaments, focusing on the United Nations Register of Conventional Arms and the United Nations standardized instrument for reporting military expenditures. A regional workshop, for Member States from Latin America and the Caribbean, was held in Lima on 26 and 27 November 2002, and a subregional workshop was organized in Bali, Indonesia, for Member States belonging to the Association of Southeast Asian Nations (ASEAN). The Department also organized, in cooperation wit' Canada, Germany, Japan and the Netherlands, a symposium on 15 October 2002 at United Nations Headquarters to mark the tenth anniversary of the operation of the Register. A booklet to highlight the occasion was published by the Department with the assistance of the Government of the United Kingdom of Great Britain and Northern Ireland. The Department also issued a booklet in November

2002 through the Regional Centre for Peace, Disarmament and Development in Latin America and the Caribbean, containing basic information regarding participation by Member States from the region in the Register.

5. The present report, submitted pursuant to the request of the General Assembly in its resolution 57/75, is the eleventh consolidated report issued by the Secretary-General since the establishment of the Register. The report contains data and information provided by 115 Governments on imports and exports of conventional arms covered under the Register: battle tanks, armoured combat vehicles, large-calibre artillery systems, attack helicopters, combat aircraft, warships and missiles and missile launchers for the calendar year 2002. It includes additional information provided by Governments on procurement from national production and military holdings. The replies received are contained in sections II and IV. Any additional replies received from Governments will be issued as addenda to the present report.

6. Section III of the present report contains an index of the background information submitted by Governments in accordance with paragraphs 10 and 18 of resolution 46/36 L and paragraph 5 of resolution 47/52 L. The background information is available for consultation at the Department for Disarmament Affairs of the Secretariat.

II. Information received from Governments

7. Information received from Governments is presented below as follows: (a) a complete table listing all the replies received by the Secretary-General, and (b) an index of individual replies of Governments. Where appropriate, the relevant parts of notes verbales are also reproduced.

8. The composite table is provided for ease of reference. As regards the information contained in the table, it should be noted that a "yes" denotes a submission of data regarding imports and/or exports in relation to the seven categories of arms covered by the Register during the reporting period. For the purpose of uniform tabulation, responses by Governments that contained either "nil", "none", "0", a dash (-) or which otherwise indicated that no exports and/or imports in the categories covered by the Register had taken place are reflected in the tables as "nil" reports. A blank space under data on imports and/or exports in the composite table indicates that no information was provided. In some cases, however, an explanation can be found in the note verbale of the country in question, as indicated above. Only those parts of the standardized forms that contain specific data and notes verbales of Governments providing relevant information are reproduced in part B of this section. Replies in the standardized reporting forms and the simplified "nil" reporting form or in notes verbales containing "nil" or blank reports are listed in the composite table only.

Cuba

[Original: Spanish]
[15 May 2003]

Cuba considers transparency in armaments to be an important element in creating an environment of confidence and averting tension between States. The United Nations Register of Conventional Arms is one specific measure that can contribute to the achievement of that goal.

For that reason, Cuba participates in the Register every year and submits the required information at the proper time to the United Nations Secretariat.

It should be borne in mind, however, that transparency is only one of many means of confidence-building that can be useful in easing tension and reducing the possibility of military confrontation.

The Register must be balanced, comprehensive and non-discriminatory and should promote the national, regional and international security of all States, in accordance with international law.

Cuba recognizes that the United Nations Register of Conventional Arms is an important global confidence-building measure, in that it provides information on international transfers of seven categories of conventional weapons that may be used for offensive as well as defensive purposes.

For this instrument to be complete, however, it should also include weapons of mass destruction, in particular nuclear weapons, as a transitional measure towards a complete ban on such weapons, which is the only solution to the dangers that their existence entails.

Although there are international instruments prohibiting, restricting or regulating weapons of mass destruction, holdings of such weapons are not registered and only partial information is available on some types. Their inclusion in the Register would provide a much broader picture of arms transfers worldwide.

The inclusion in the Register of information related to sophisticated conventional weapons, weapons of mass destruction, in particular nuclear weapons, and transfers of equipment and technology directly related to the development and production of such weapons, which have a destructive and destabilizing potential much greater than that of conventional weapons, would make the Register a more balanced and comprehensive instrument and attract the participation of a greater number of countries.

Transparency, then, is not an end in itself, but a means of contributing to the elimination of the threats posed by armaments of all kinds.

At the same time, it should always be borne in mind that all States have the right of self-defence, which is enshrined in the Charter of the United Nations, and, in

consequence, the right to procure weapons, including from outside sources, in order to provide for their security. Therefore, legal arms transfers cannot be prohibited.

The Register is a confidence-building tool that should not obscure the legitimate security concerns of States. It is a tool to be complemented by others at the national, regional and global levels.

Cuba feels that the voluntary nature of the Register is adequate to permit transparency in armaments and confidence-building.

To improve the operation and enhance the credibility of the Register, it is essential that a common definition of what constitutes an international arms transfer be adopted, in order to avoid discrepancies in the information provided by States.

Cuba shares the view that the provision of information by Member States on their military holdings and procurement through national production should remain voluntary until a consensus is reached on the issue.

Cuba hopes that the group of governmental experts to be convened in 2003 pursuant to General Assembly resolution 56/24 Q will build on the work of analysis done by previous expert groups on this issue and will continue to take duly into account the information and views presented by States.
